Four automobilists and one young granite man of this city were in jeopardy at Nichols' garage yesterday morning and man and machines came near being blown into atoms. The men were all around the gasoline tank and an automobile had just been filled from the tank when the granite man scratched a match to light his pipe. The head of the lighted match flew out and dropped through the hole in the floor where the gasoline is drawn up from the tank. Instantly there was a puff and a flash that streaked up several feet into the air, and it is putting it mildly to say that the five men made a hasty retreat, expecting that the tank with nearly 500 gallons of gasoline in it was going up too. Only the gasoline that had been spilled around the hole burned, however, but the witnesses of the scene have not fully recovered from their fright yet.
